

# When & Why to Use AI Search in Legal Research

AI search works best as a supplement to traditional legal research, helping lawyers accelerate discovery while continuing to rely on authoritative databases for verification and detailed analysis

# ***When to Use AI Search***

- ✔ For conceptual or exploratory legal questions
- ✔ For complex doctrinal questions involving: statutory interpretation, judicial standards, multi-layered precedents
- ✔ For corporate and commercial law issues framed as legal problems rather than section-specific searches.
- ✔ For fact-based legal scenarios where the issue must first be identified from facts.
- ✔ When the precise keywords, case names, or statutory provisions are unknown
- ✔ When beginning research on unfamiliar legal topics

# ***Why Use AI Search***

- ✓ Understands natural-language queries
- ✓ Identifies related legal concepts automatically
- ✓ Quickly surfaces relevant judgments with analysis
- ✓ Reduces time spent on multiple keyword searches
- ✓ Assists in preliminary legal analysis and research direction
